

# Things are People too

An analysis of our relationship to the  
internet of things from an animist point of view

# Overview

- On Animism
- Research Design
- Findings and Implications

“Animism had endowed things with souls;  
industrialism makes souls into things.”

- Max Horkheimer and Theodor Adorno

“Animism had endowed things with souls;  
industrialism makes souls into things.”

- Max Horkheimer and Theodor Adorno

# Animism

So... about this term?

# Animism

- treating or seeing the other-than-human as a subjects
- different sources; why
- different expression; how

*Active Expression*  
successful integration

perceived as  
having agency,  
being alive, etc.

*Phenomenological*  
*Source*

# Animism Mental Model

how

why

*unable to integrate*  
*Re-Active Expression*

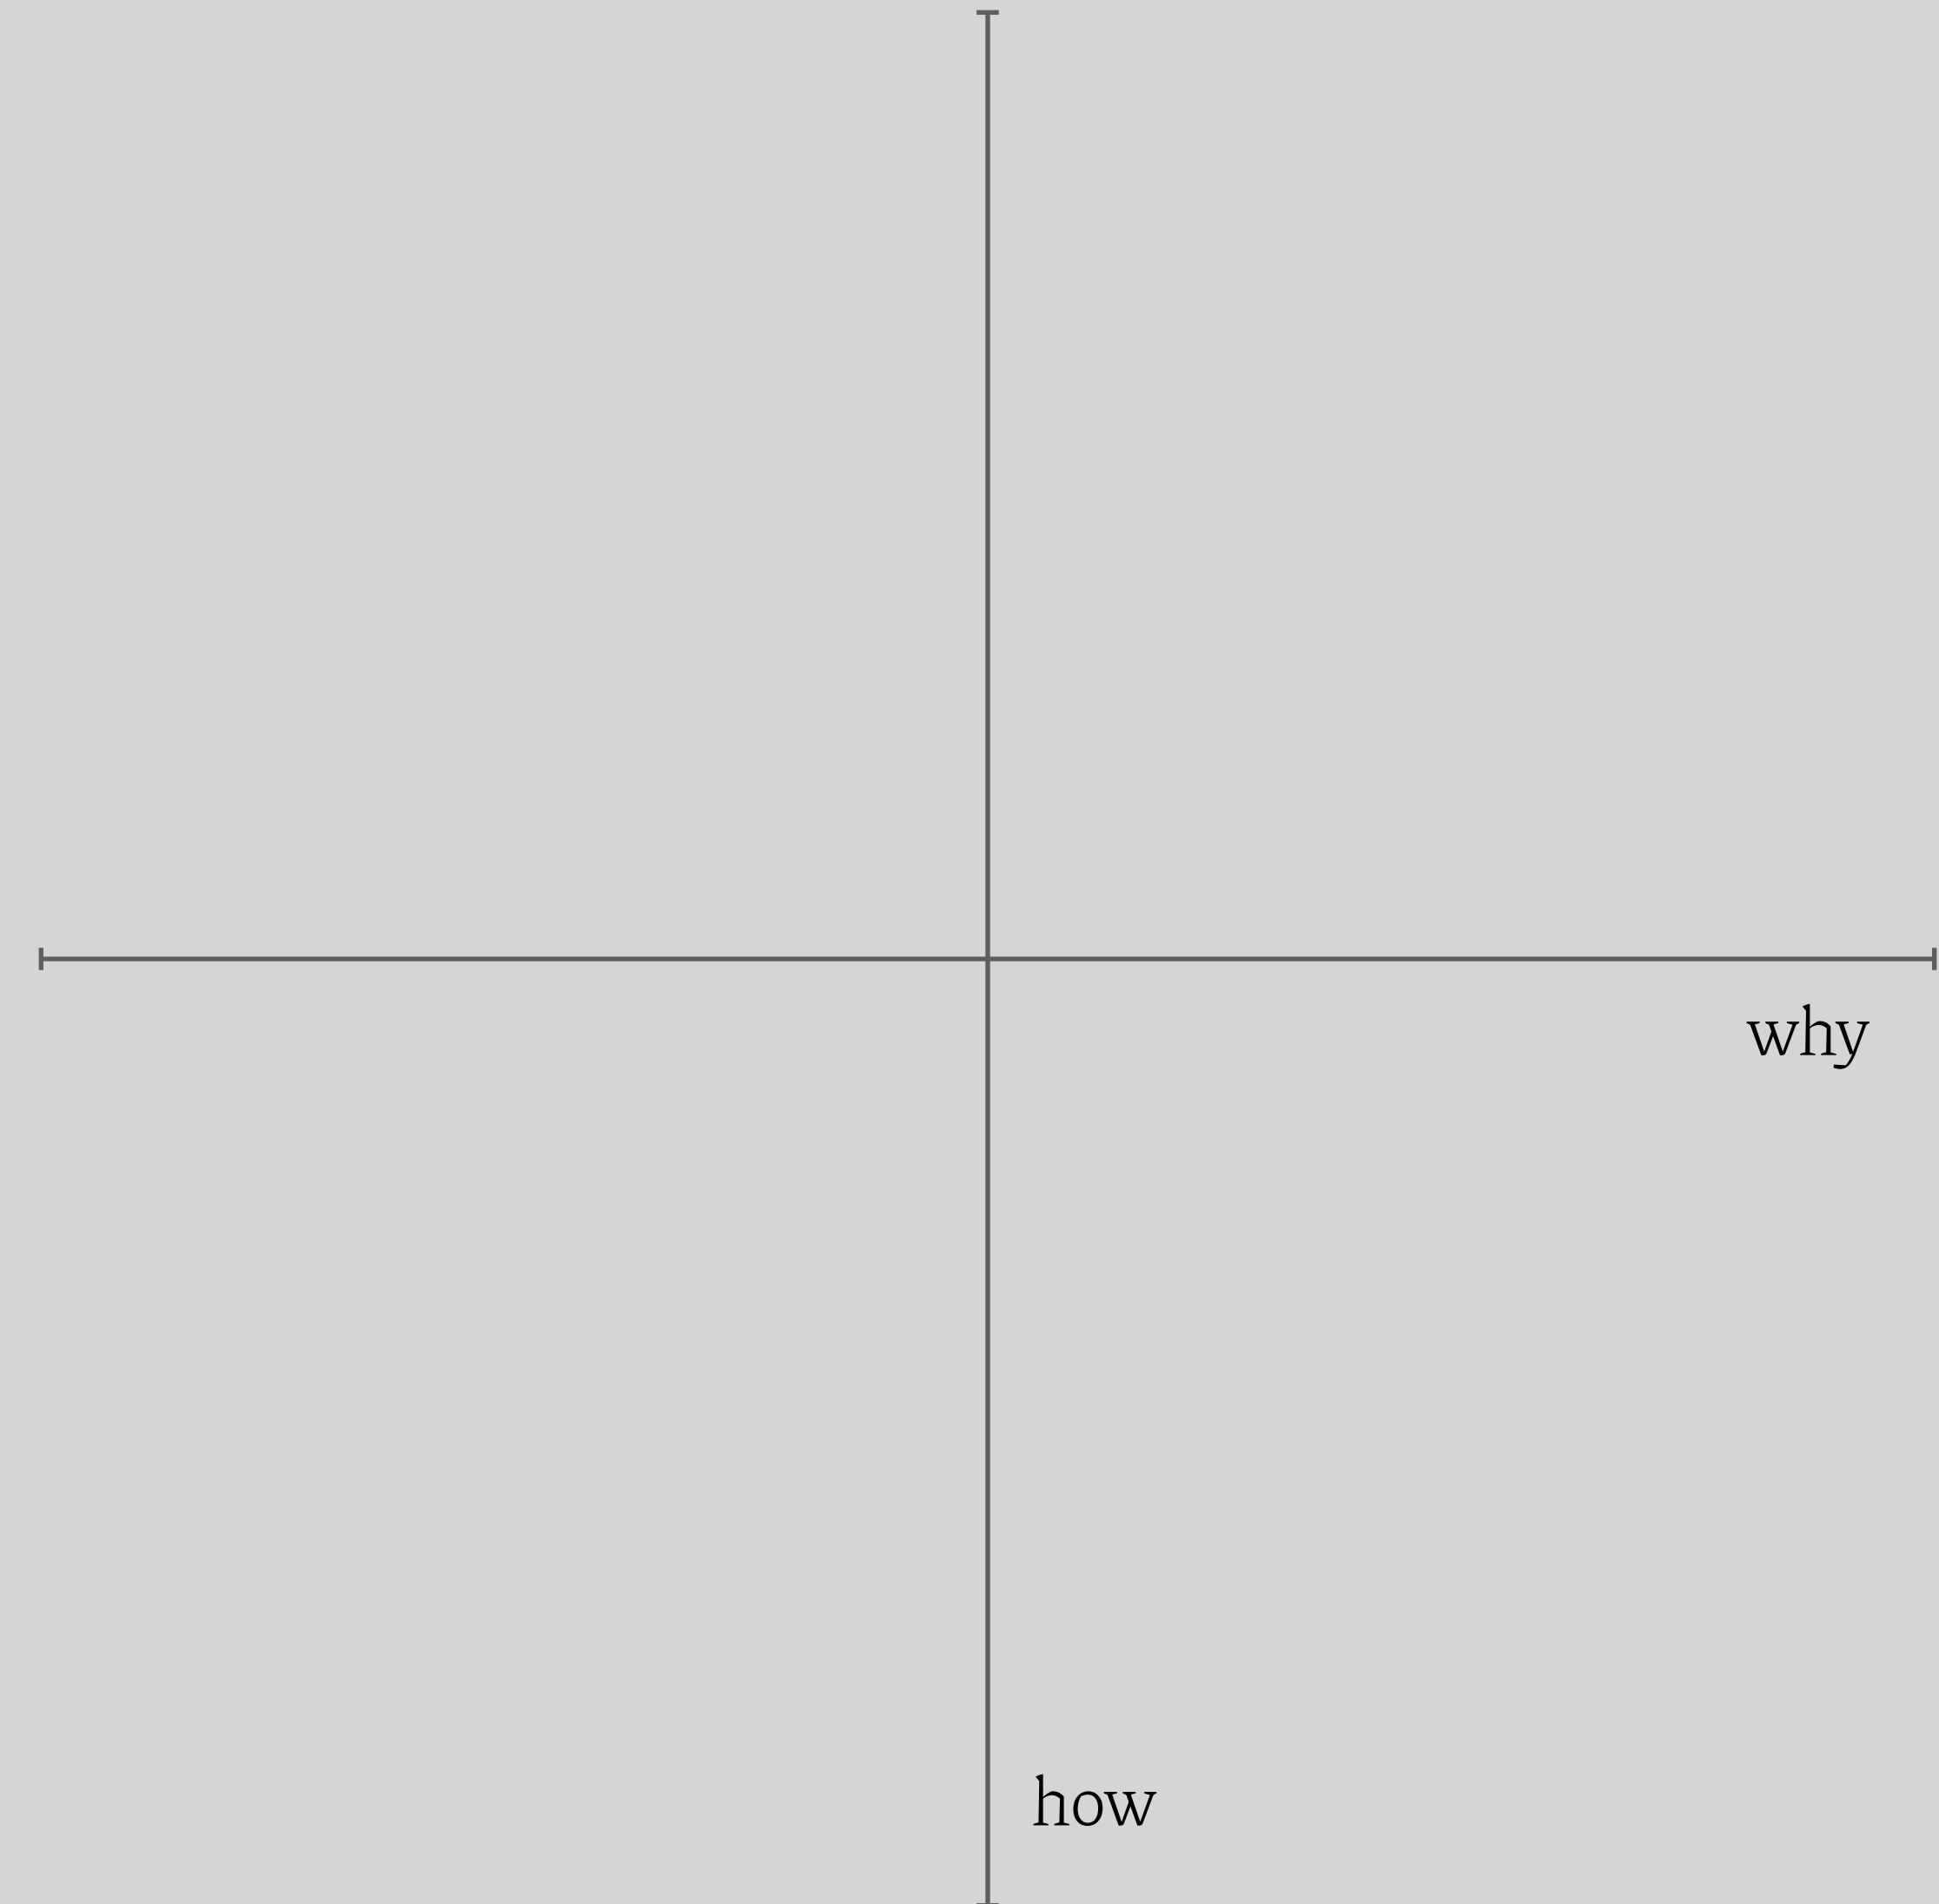

qualities attributed  
through knowledge

*Epistemological*  
*Source*

*Active Expression*  
successful integration

perceived as  
having agency,  
being alive, etc.

*Phenomenological*

# Hypothesis

Animism can aid in the development of emotional durable design.

How could we use that potential in designing our relationships to consumer electronics?

# Research Design

- Swiss Participants
- Voice Assistants
- Emotional Durable Design
- Weak Signals

“Waste could be seen as nothing more than a symptom of a *failed relationship*.”

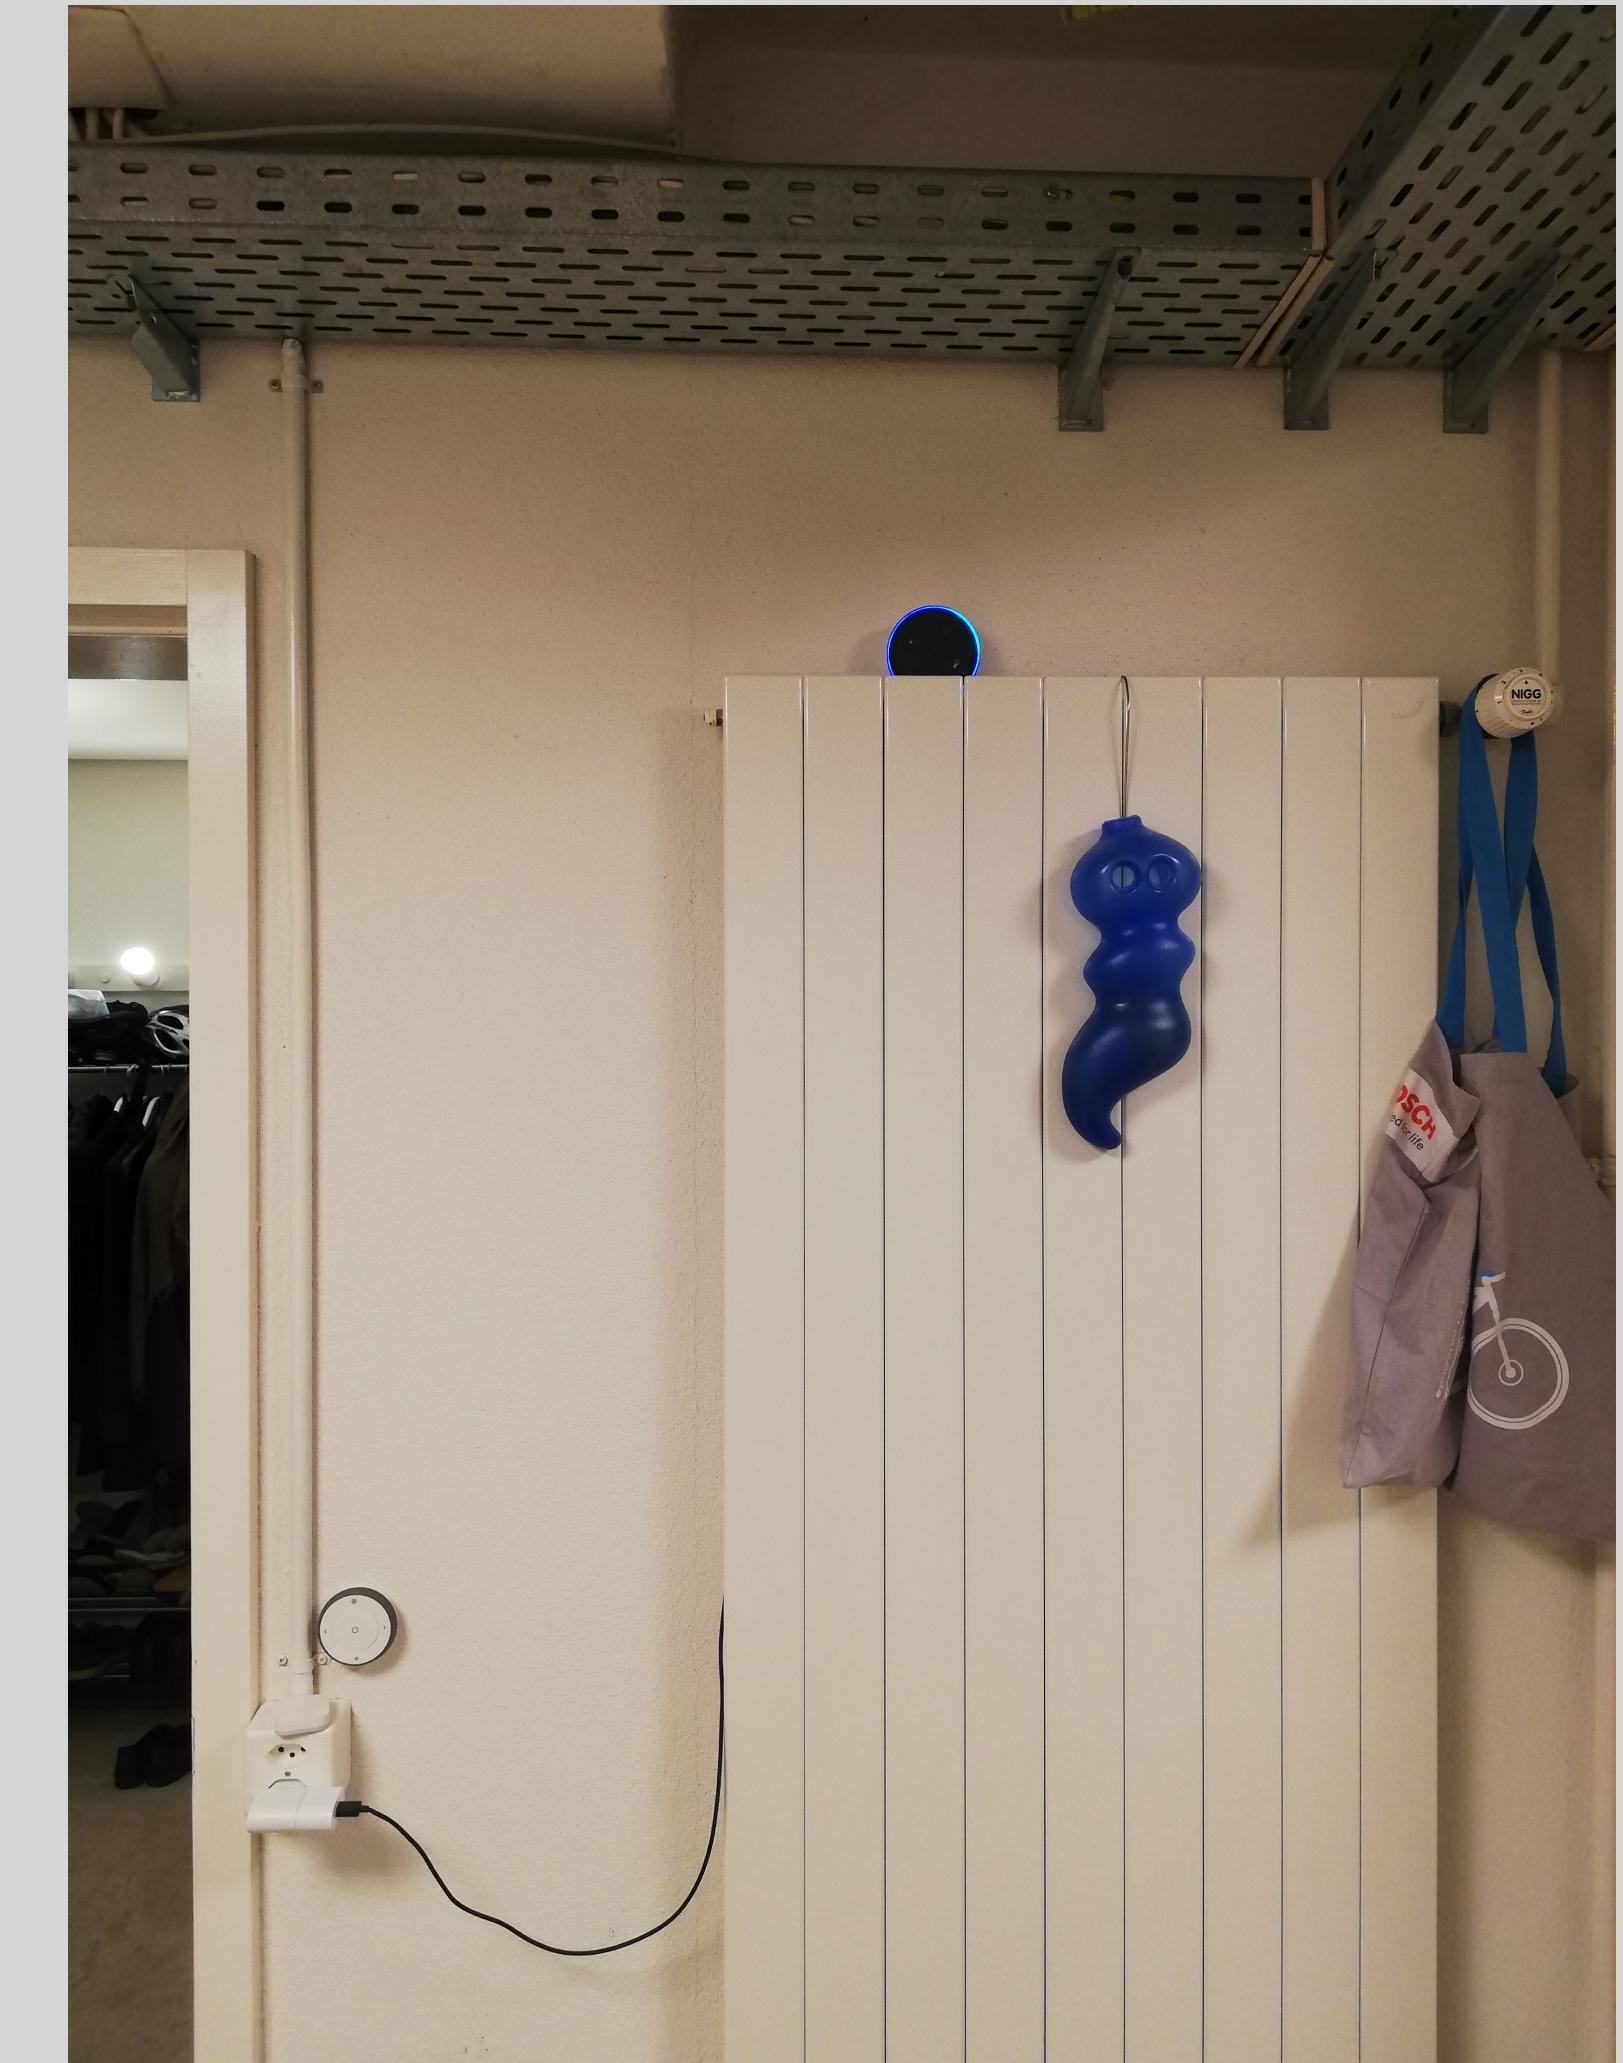

- Jonathan Chapman

# Weak Signals

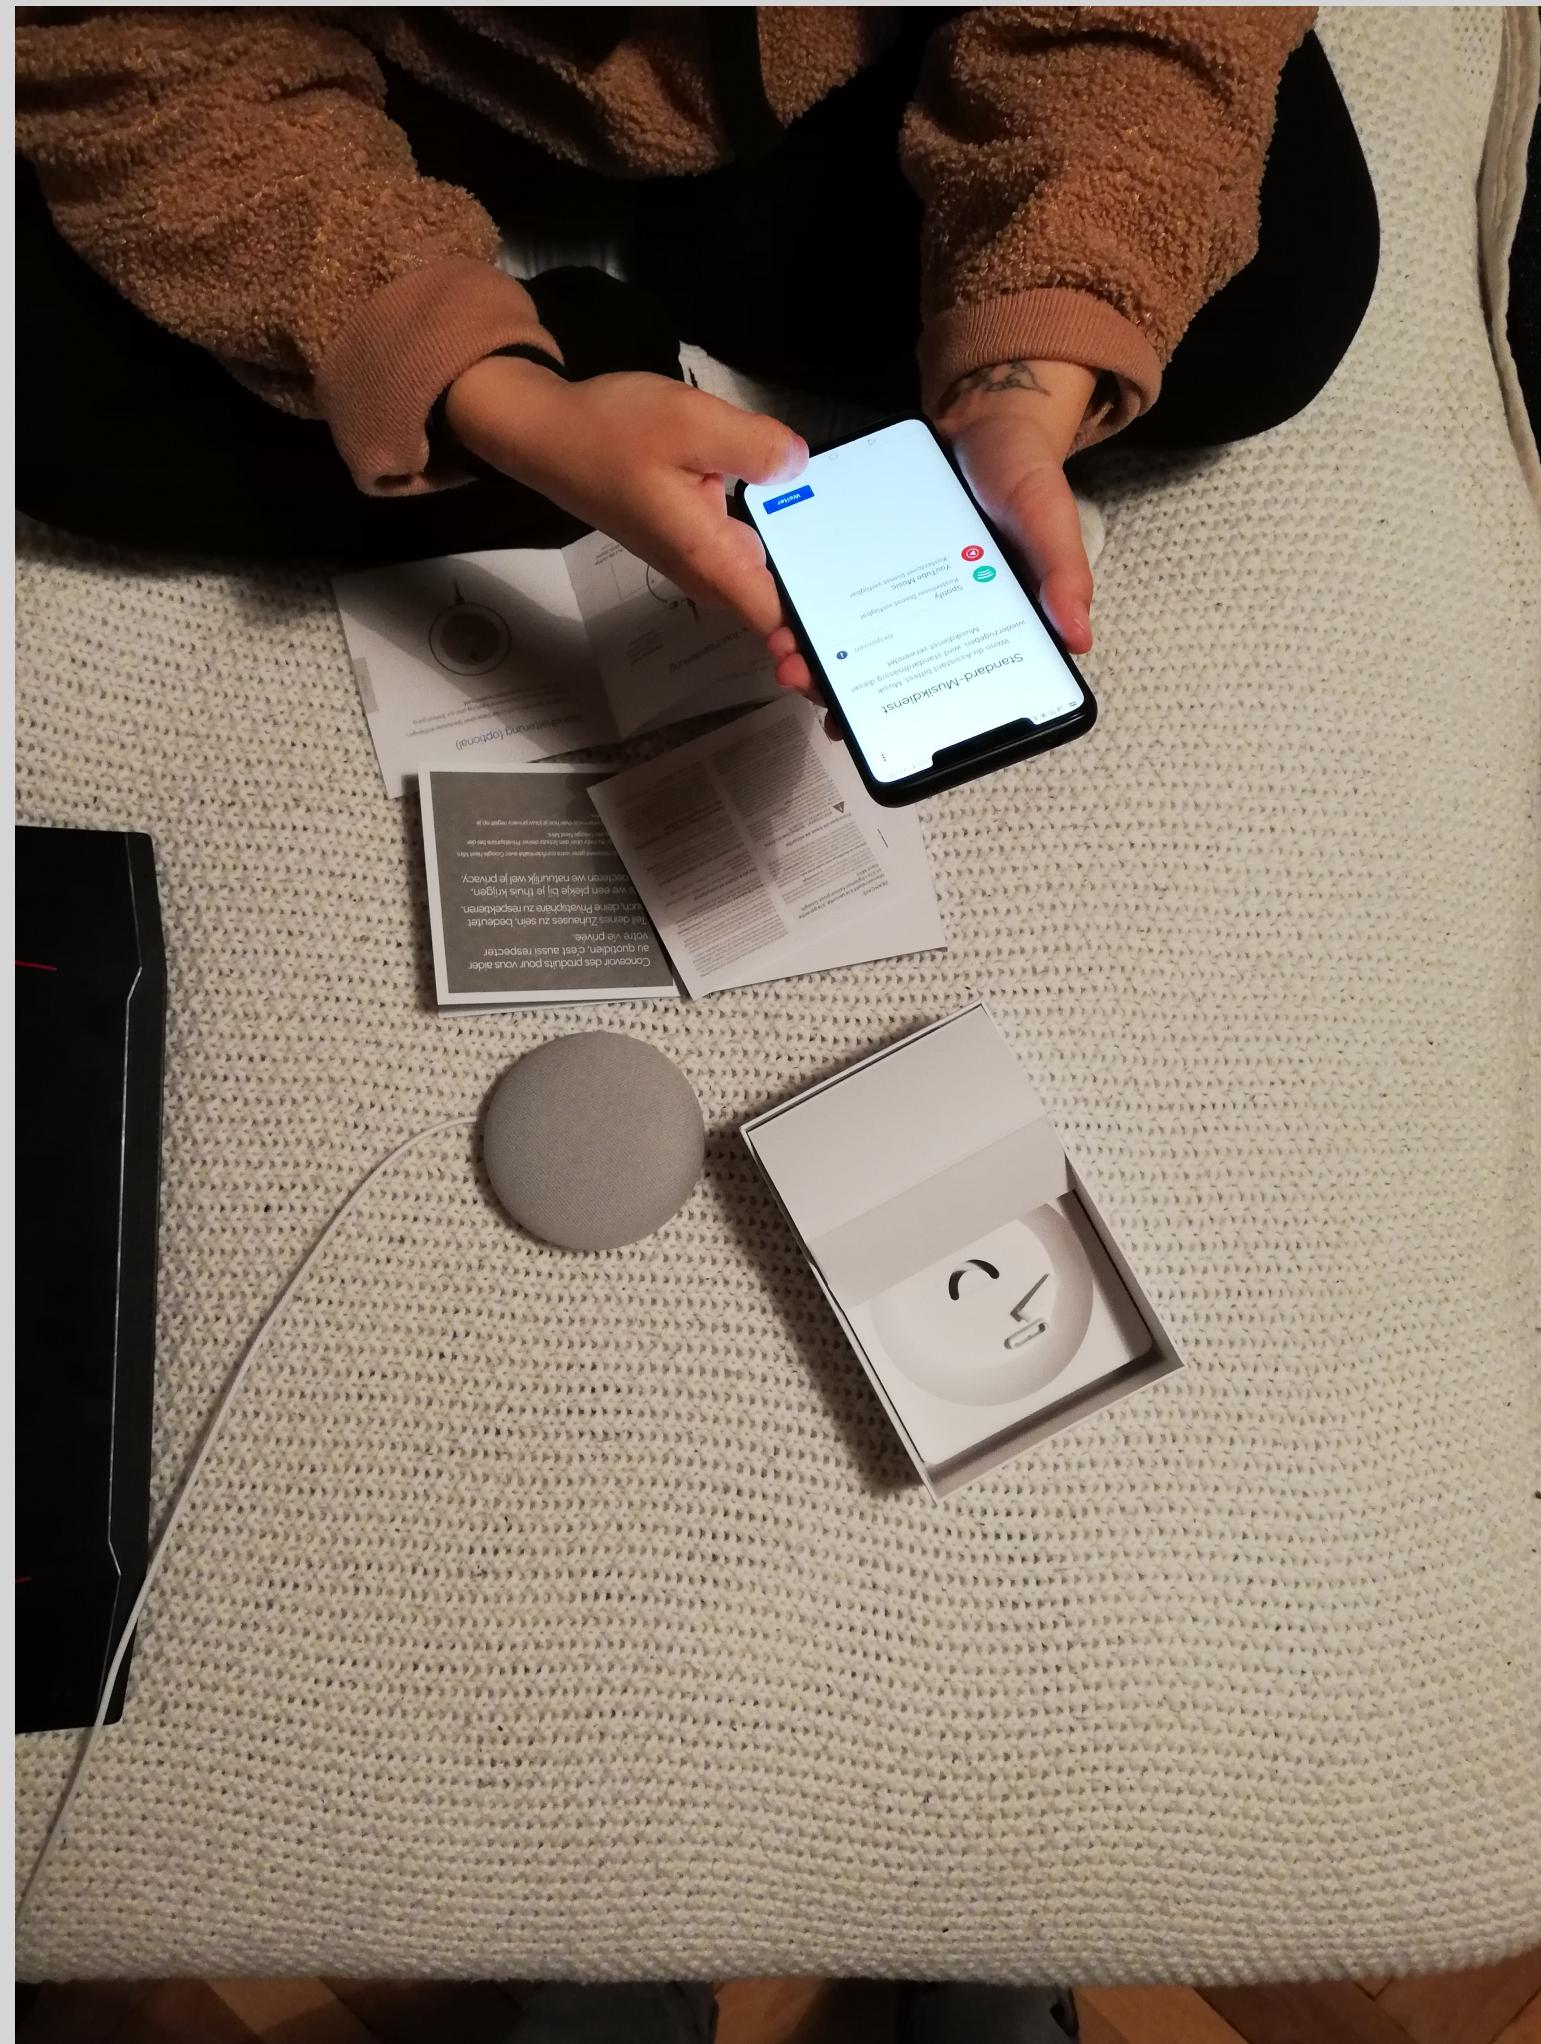

- Speculative/Future Design
- Like Micro Trends

# Data Collection

# Data Collection, Observation and Interviews

# Data Collection, User Journeys

# Data Collection, Netnography

- user experience reports
- brand utopias through advertisement
- hacked and customised devices

# Data Colle

- user experi
- brand utop
- hacked anc

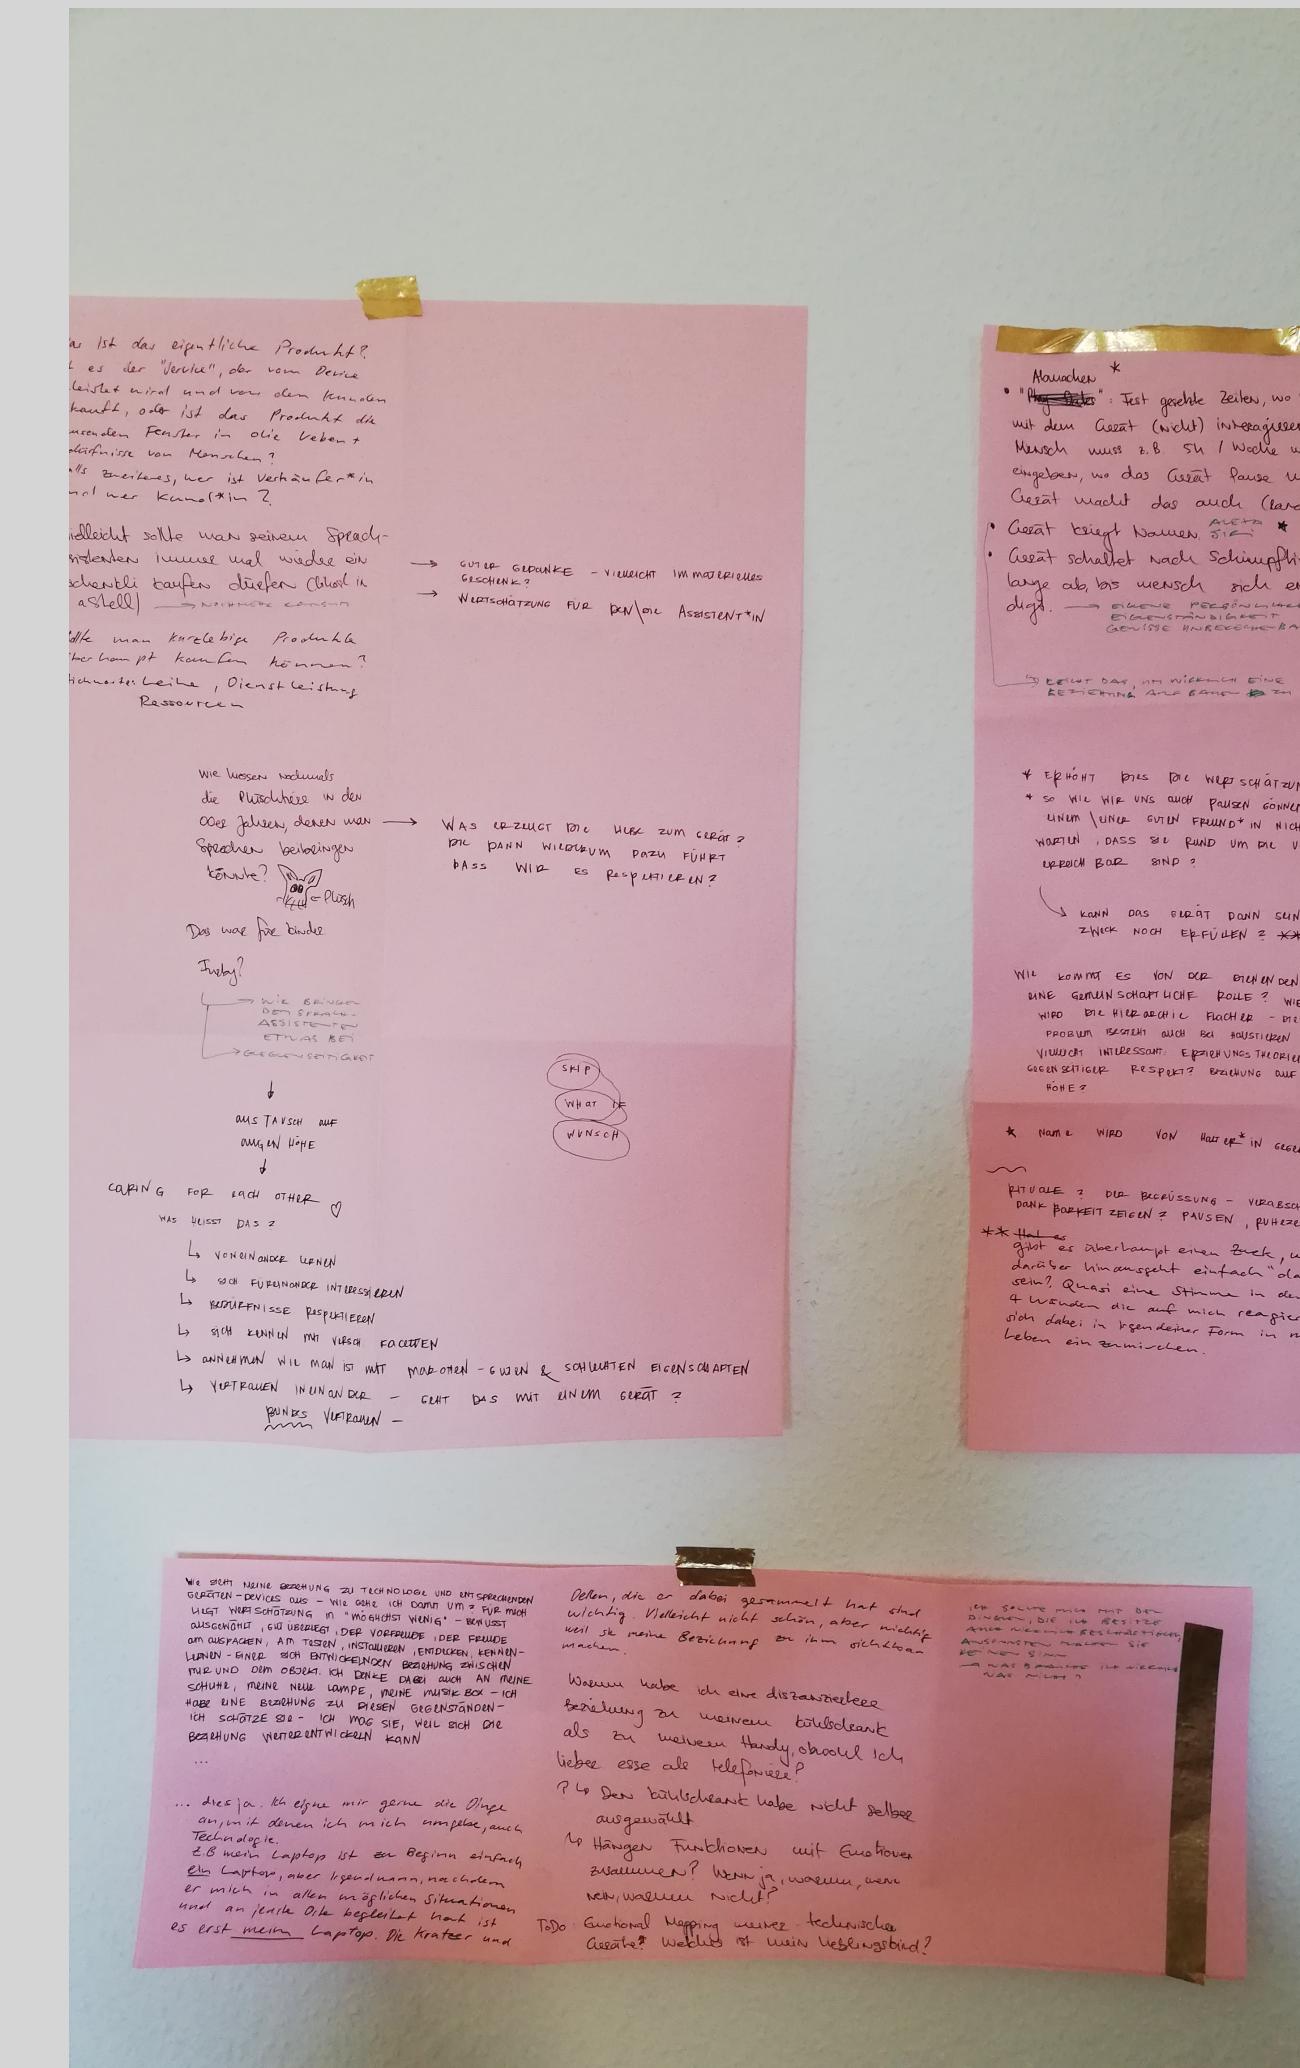

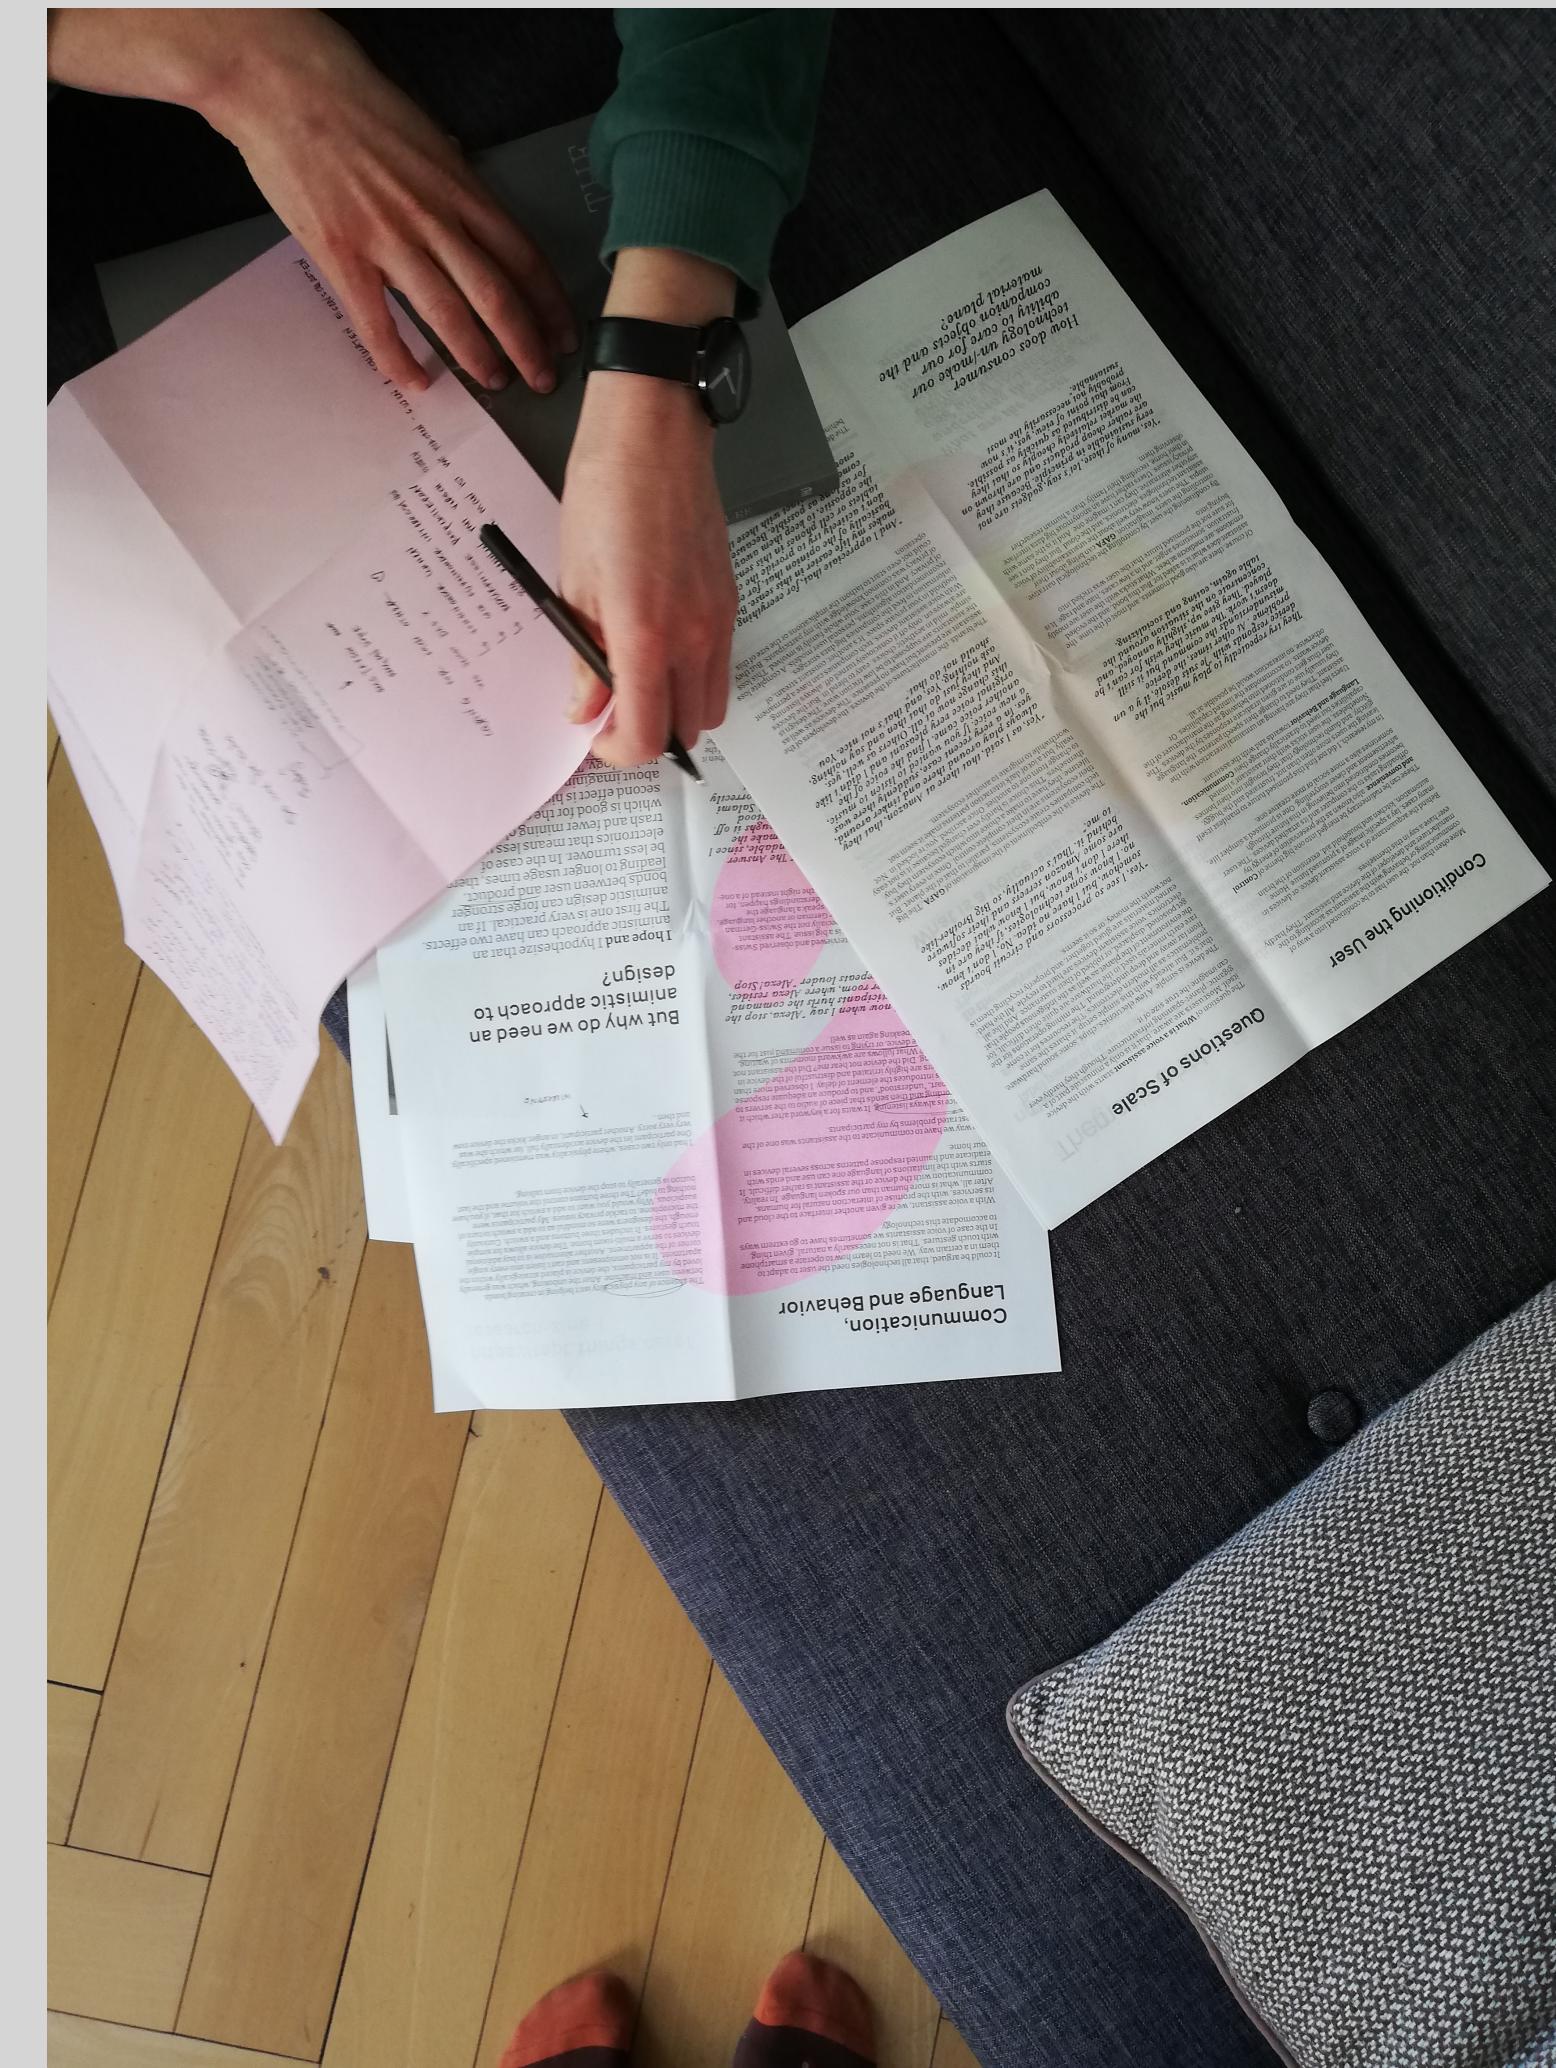

# Data Collection

- user experience
- brand utopias
- hacked and cul

# Data Collection, Expert Workshop

# Thematic Analysis

# Thematic Analysis

reflexive approach after Brown and Clarke

- Classical qualitative data analysis; coding
- Themes don't emerge, they are actively created
- Trail of Truth through reflexive journal

# Findings

# *Active Expression*

successful integration

*Phenomenological  
Source*

perceived as  
having agency,  
being alive, etc.

*Epistemological  
Source*

qualities attributed  
through knowledge

why

how

unable to integrate

# *Re-Active Expression*

*Active Expression*

qualities attributed  
through knowledge

# Findings

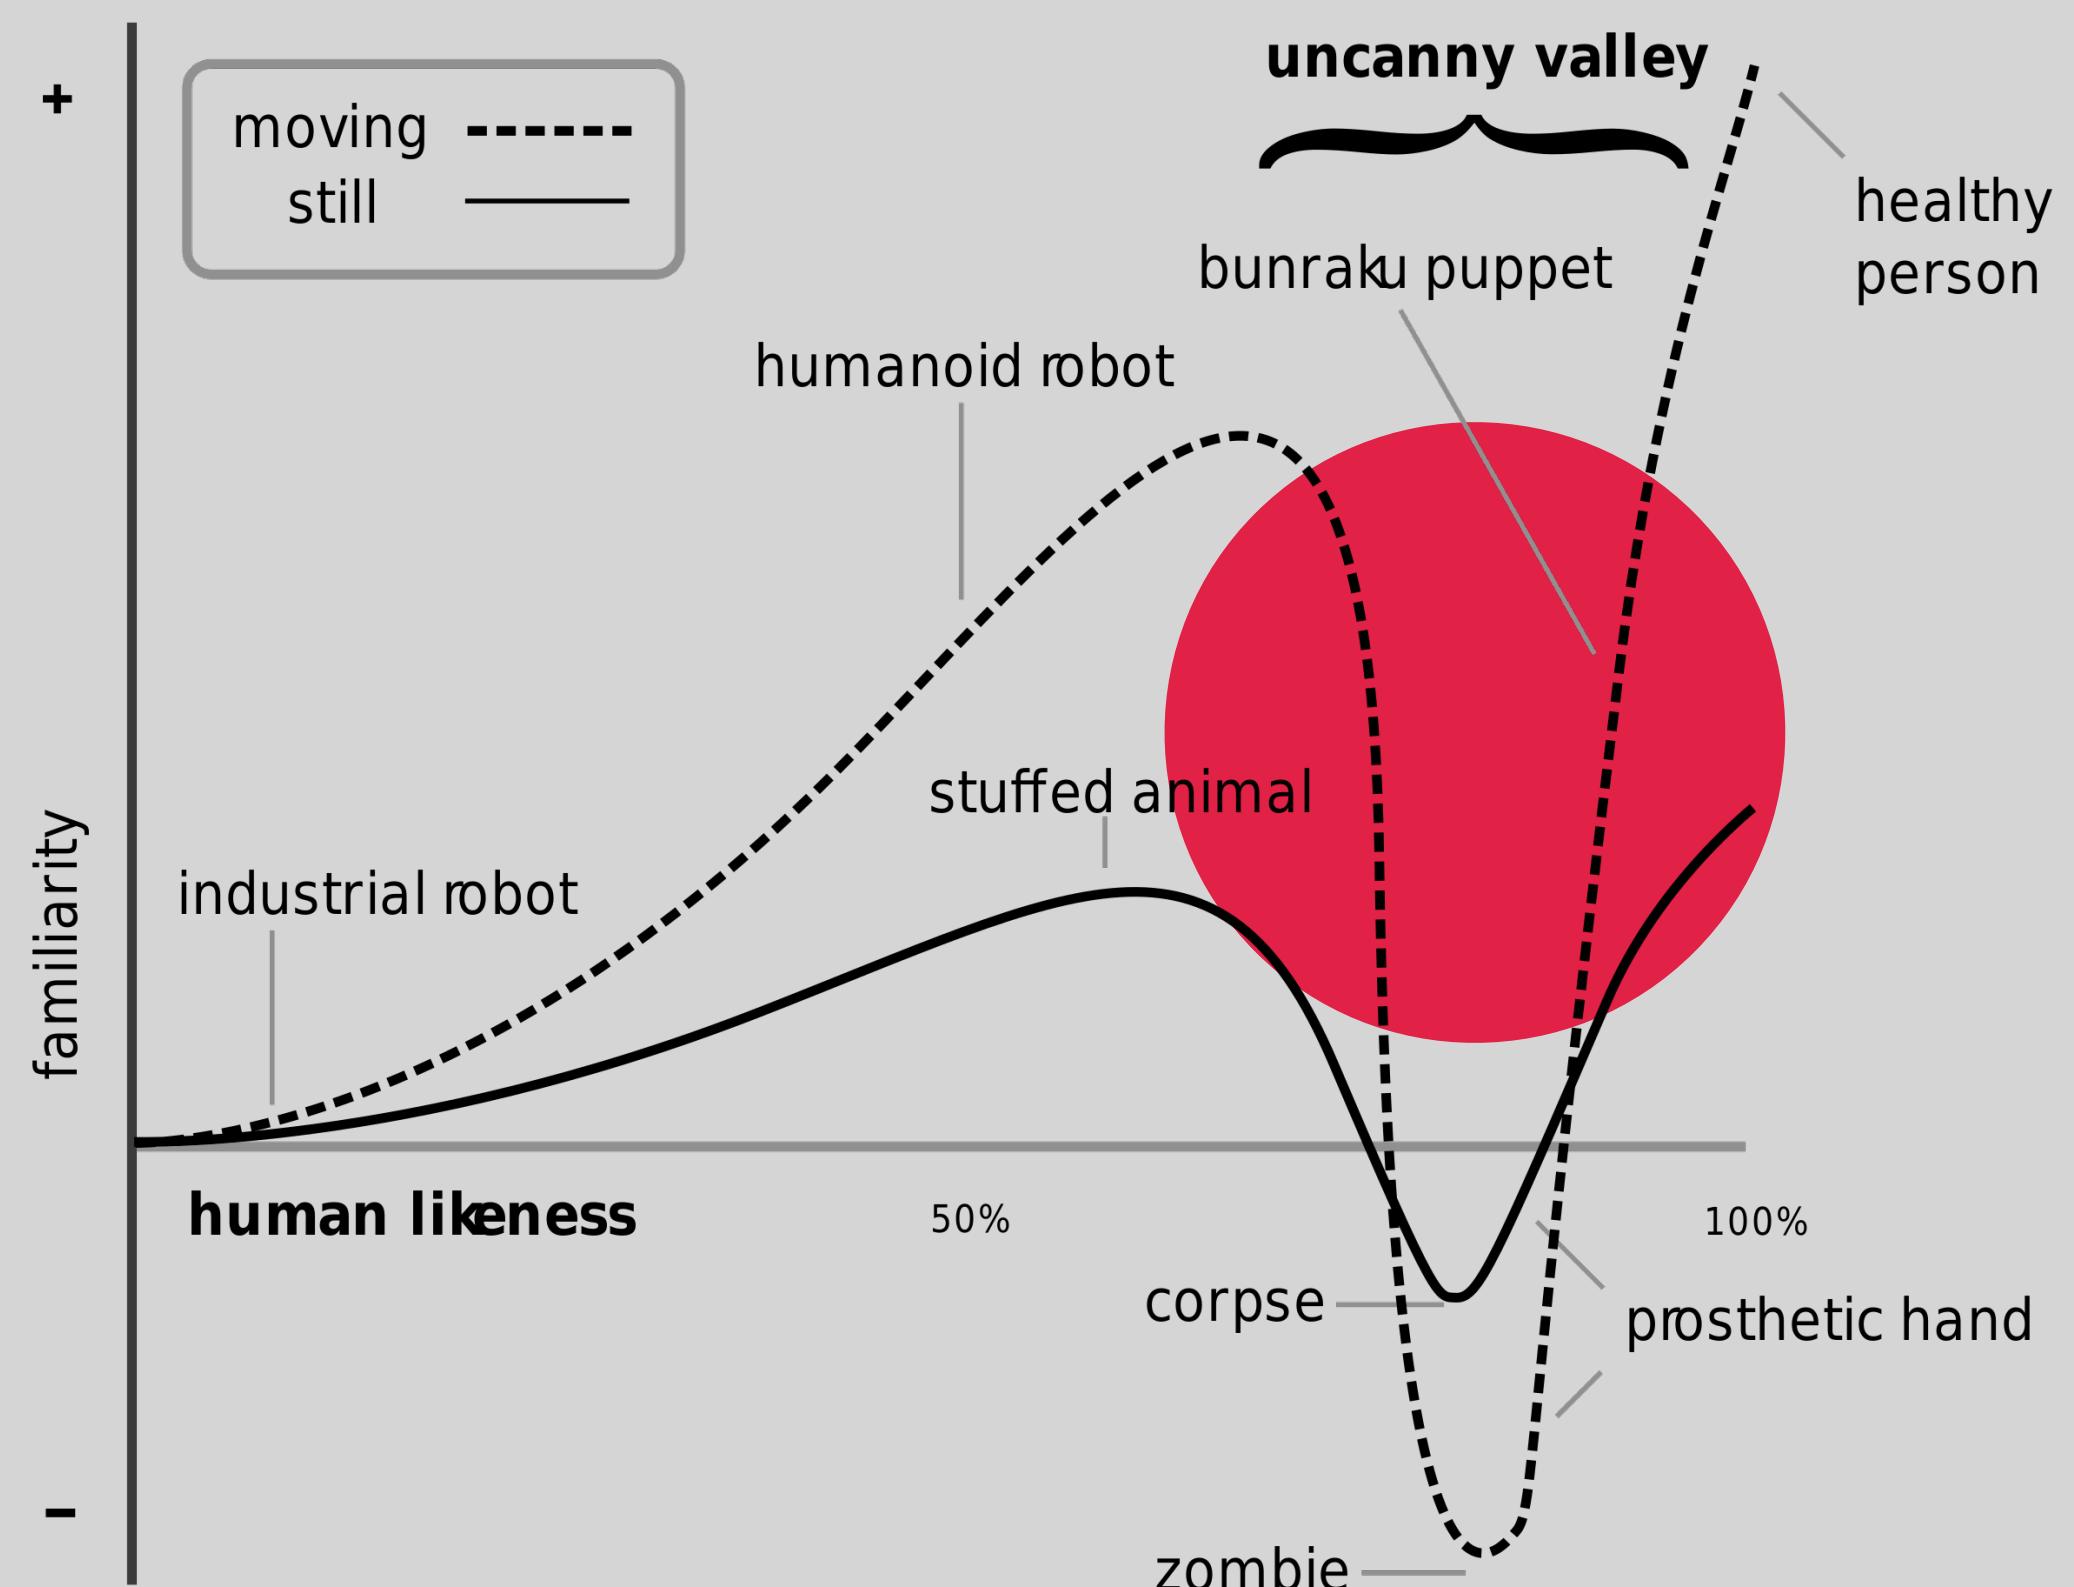

- Uncanny Valley
- Trust Issues

# Uncanny Valley

Contrasting feelings

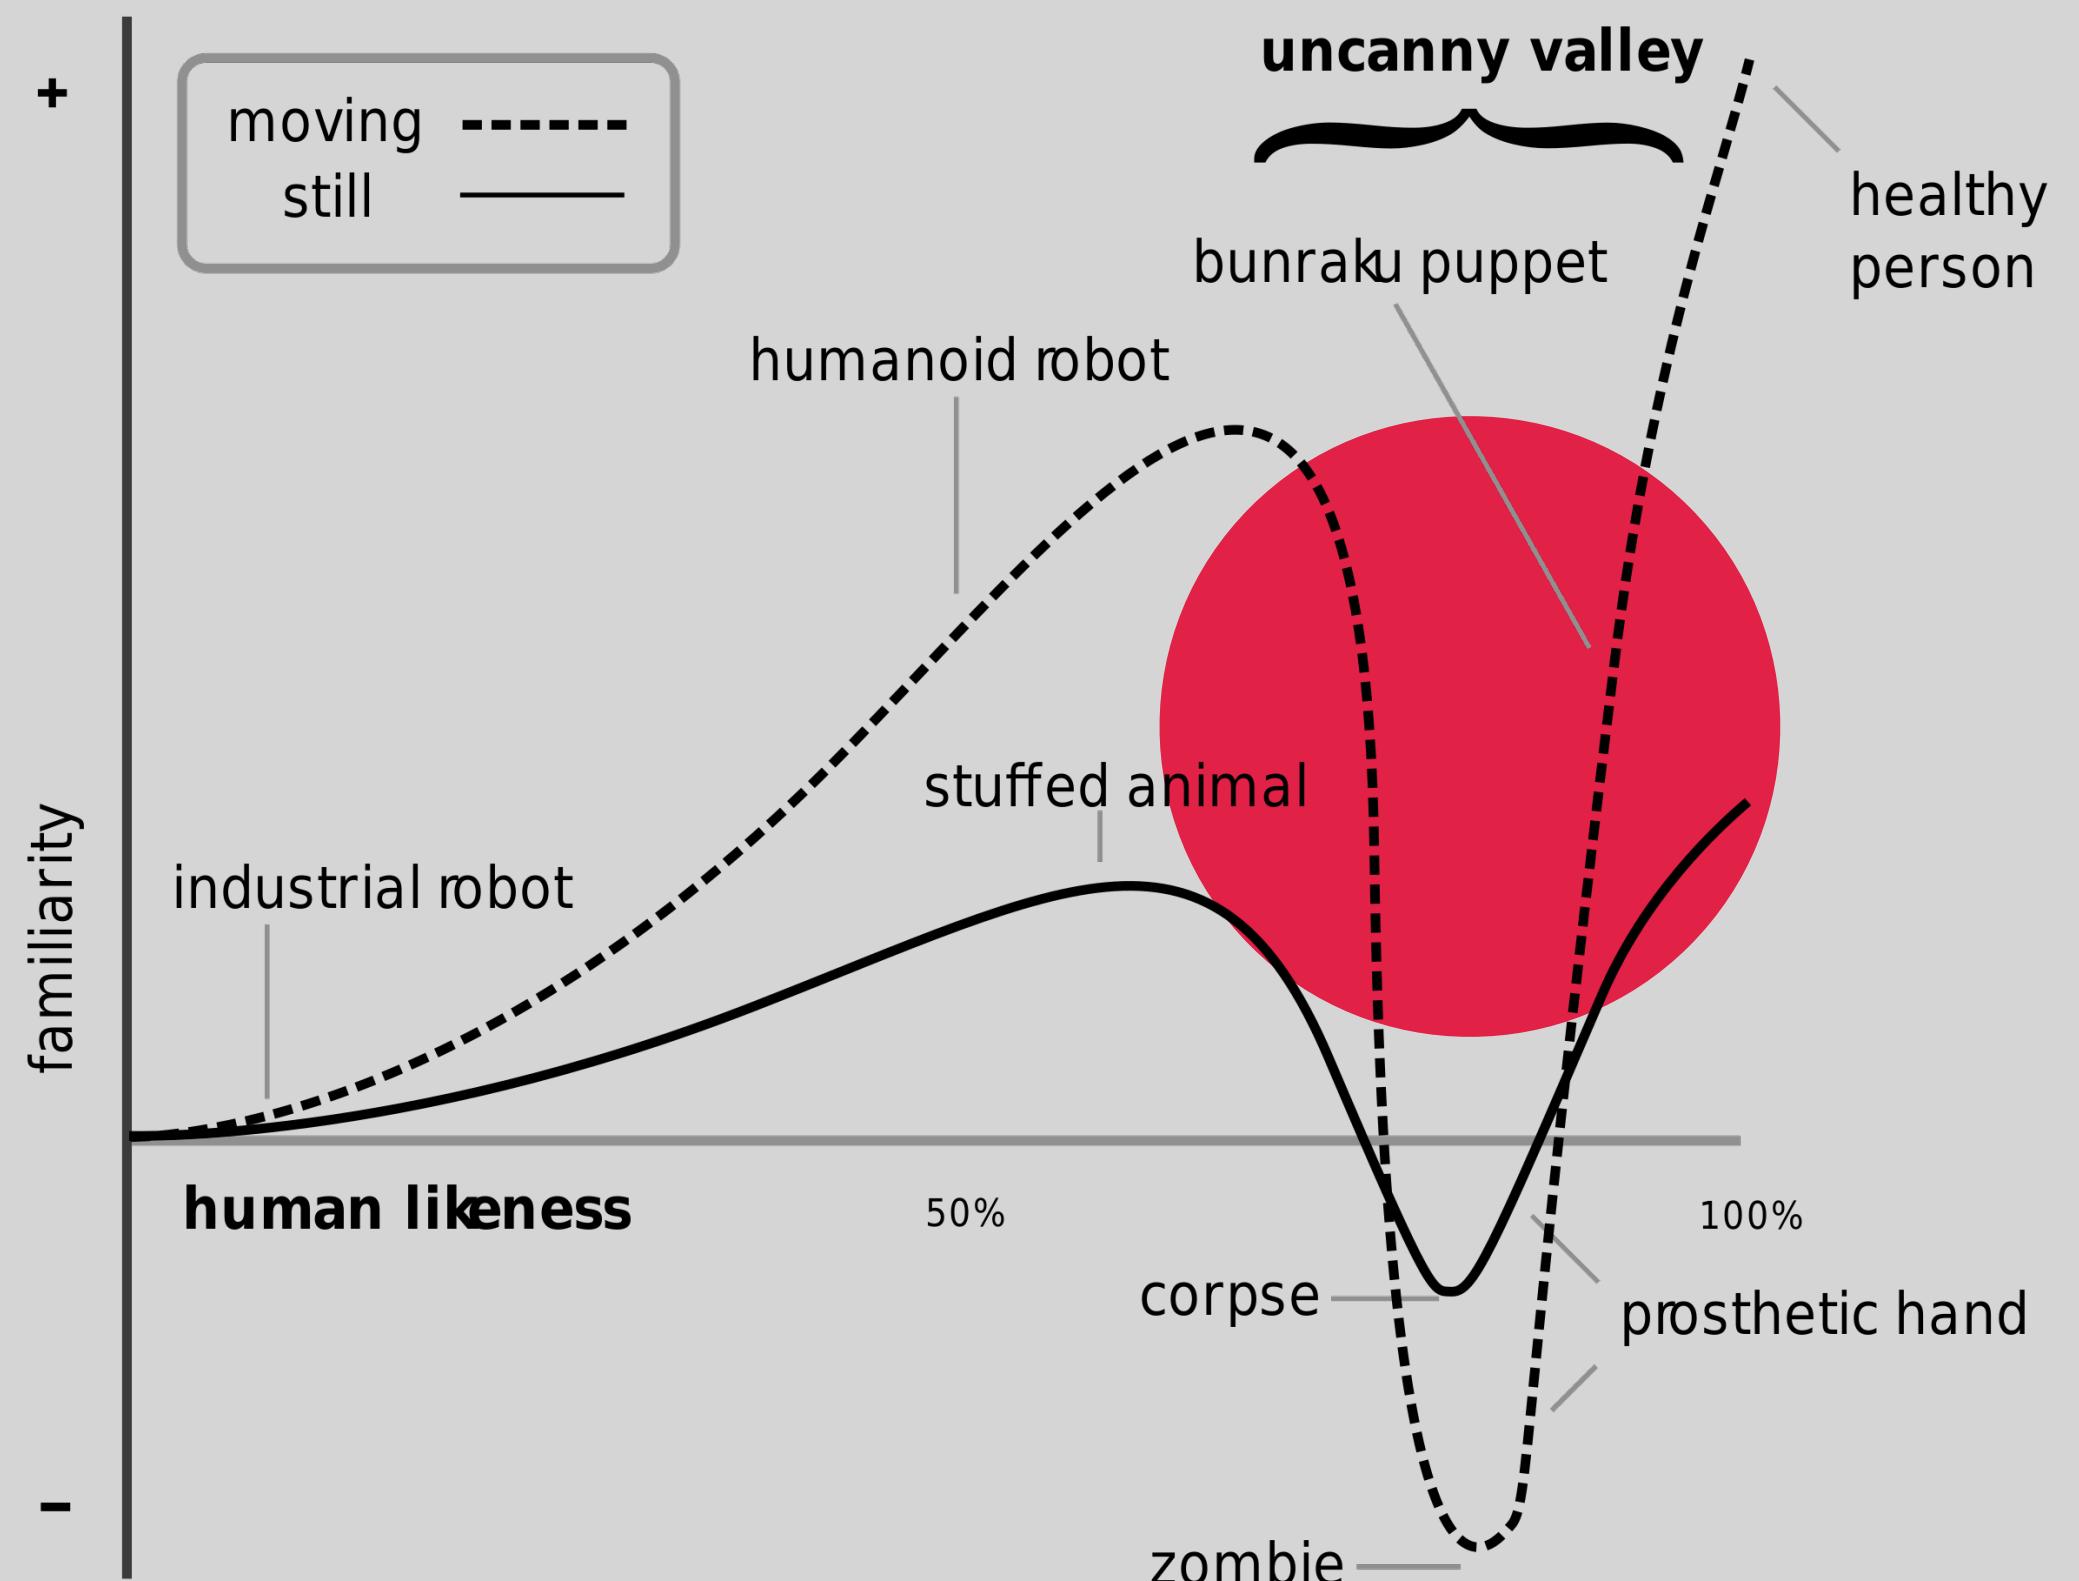

# Findings

## Uncanny Valley

# Findings

## Uncanny Valley

“[...] it seems the closer these smart objects get to human behavior, the more they trigger contrasting feelings.”

- Jean-Marc Buchert

# Findings

## Uncanny Valley

Human Voice versus Non-Human expressions

- activity without interaction
- uncanny communication
- ghostly presence

# Findings

## Uncanny Valley

Participants miss a proper vocabulary  
to deal with the other-than-human presence  
in case of errors and generally have  
a hard time bonding with voice assistants.

# Trust Issues

Privacy, Intimacy, Consent

# Findings

## Trust Issues

- Privacy
- Intimacy
- Consent

# Findings

## Trust Issues

- Privacy
- Intimacy
- Consent

“Yeah, just some creepy little alien in the shadows, lurking, waiting to be used. It's a bit of a poor slave actually.”

- Participant j5mwdx

# Implications

- Animism 
- Narrow down Hypothesis
- Precision in Research-Questions

perceived as  
having agency,  
being alive, etc.

## *Phenomenological* Source

## *Re-Active Expression*

how

unable to integrate

## *Active Expression* successful integration

why

## *Epistemological* Source

qualities attributed  
through knowledge

# Prototyping

How can we negotiate trust,  
respectively privacy, intimacy and consent  
with internet of things devices  
like voice assistants?

# Prototyping

# The Future?

# The Future...

Thank you
